Designing the best off the shelf knee Braces, roost deflectors and race collars to protect athletes for over 35 years.

# EVS SPORTS

For over 35 years ago, EVS Sports has revolutionized protection in the sport of motorcycling. Ever since the first motocross specific knee brace all those years ago, EVS has evolved and transformed into becoming the leader in innovation and technology in the protection industry; EVS now offers a full line of knee braces, helmets, race collars, roost deflectors and a host of other protective gear products made for almost any activity imaginable.

Whether your passion is motocross, street riding, hitting the trails or if you just love twisting the throttle, EVS has been happy to protect all of you while you do what you love and will continue to do so for years to come. Dirt, snow or asphalt, the EVS team has the same love affair with powersports you've grown up with and we've spent our lives making sure you're protected and prepared for any obstacle that comes your way.

# AXIS PRO

## KNEE BRACE

The EVS Axis Pro Knee Brace combines superior protection and comfort with premium materials. The result is pro-level knee protection that fuses a carbon fiber upper cuff with an aluminum lower frame for an incredibly rigid yet comfortable, lightweight and fluid, low-profile knee brace. Other premium features such as Stretch Fit strap technology, Dual Defense knee cups, Shark Skin antimicrobial liner, and Tru-Motion 2.0 Hinge with zero to 30-degree hyperextension lockout are only a few reasons why the Axis Pro Knee Brace is the choice of professional and amateur racers alike. CE 1621-1 and EN 1621-1 Certified.

# AXIS SPORT

## KNEE BRACE

With many of the same features found on the Axis Pro, the Axis Sport features EVS's Form Fit Frame technology constructed from a proprietary blend of polyfusion polymer for a strong yet flexible base that bends to the contours of a rider's thigh to deliver a comfortable fit. An aluminum frame is combined with lightweight nylon-injected upper and lower cuffs for optimal comfort and flexibility. The Tru-Motion 2.0 Hinge System mimics natural knee movement to provide a more natural stance. With a laundry list of features, it's easy to see why the Axis Sport Knee Brace is a favorite among professional and recreational riders alike. CE 1621-1 and EN 1621-1 (K) Certified.

# SX01

## KNEE BRACE

The SX01 Knee Brace offers compression and support in a soft, form-fitting pull-on brace. The SX01's Dual Nylon Strap System firmly secures the brace to each leg with strategically placed straps that function independently. Using Airprene construction designed as orthopedic support to aid performance or rehab combined with a moisture-wicking bio-foam antimicrobial liner, the result is soft and cushioned knee support that's a favorite with riders.

Sold Individually. Youth size available.

Sizes:

# SX02

## KNEE BRACE

The SX02 Knee Brace offers compression and support in a soft, form-fitting pull-on brace. With its adjustable bilateral polycentric aluminum hinges, the SX02 provides strength and stability while limiting hyperextension. The SX02's three-point nylon strap system is designed to secure each brace firmly to the leg with the straps strategically placed to function independently. The result is a knee brace that provides accurate knee movement and a more natural feel when riding.

Sold Individually

TP199

# THERE WHEN YOU NEED THEM

Designed with input from the legendary Travis Pastrana, our line of TP199 Knee and Elbow pads have become a need for Mr. 199 with motocross, mountain biking, BMX, skateboarding, pit bikes, or anything else he feels like doing.

KNEE AND ELBOW  
PROTECTION

P8

# TP199

## KNEE PADS

The TP199 Knee Pad offers everything a rider needs: high-level support and protection without the bulk of a traditional knee brace. Explicitly designed for—and with input from—Travis Pastrana, TP199 Knee Pads feature EVS's RMF (Reactive Memory Foam) Technology for a soft and pliable pad that stiffens upon impact. Trac-Grip technology with strategically placed silicone grippers holds these knee guards in place and limits migration when riding. For the rider looking for complete knee protection and support, look no further than the TP199 Knee Pad. CE 1621-1 Certified.

Sizes:

# TP199 LITE

## KNEE PADS

The TP199 Lite Knee Pad's shorter overall profile makes it ideal for MX, Offroad, BMX, and MTB usage. Combining RMF (Reactive Memory Foam) Technology with Air Mesh perforated fabric for unimpeded airflow results in soft and pliable knee protection that stiffens upon impact. A molded bio-foam upper offers additional impact protection, while Trac-Grip technology with strategically placed silicone grippers holds the pads in place and limits migration when riding. Whether your two wheels are engine driven or pedal-powered, the TP199 Lite is a lightweight and versatile crossover knee pad. CE EN 1621-1 Certified.

Sizes:

# TP199 *NEW*

## ELBOW PADS

Explicitly designed for—and with input from—Travis Pastrana, the TP199 Elbow Guard offers everything a rider needs for high-level support and protection in a low-profile elbow pad. Using RMF (Reactive Memory Foam) Technology, the result is a soft and pliable guard that stiffens upon impact. Add to that Trac-Grip technology with strategically placed silicone grippers on the upper and lower cuffs to hold the guards in place and limit migration, and you can see why the TP199 is the ideal elbow guard for track or trail. CE 1621-1 Certified.

Sizes:

**NEW**  
**HEX PRO**  
KNEE PADS

The Hex Pro Knee Guard uses EVS's new Hex Pro Impact Technology to provide superior impact protection through a compact and lightweight insert that extends impact protection zones to the sides of the knee and upper shin. A unique U-lock ring design surrounds the impact pad's upper interior and locks it in place to limit migration during impact. The Hex Pro Knee Guard offers heavy-duty protection in a lightweight package. CE EN 1621-1 Certified.

Sizes:

**HEXPRENE**  
Provides zonal support with maximum airflow and abrasion protection.

**NEW**  
**FLEX LITE**  
ELBOW PADS

The Flex Lite Elbow Guard uses a compression sleeve design that utilizes EVS's RMF (Reactive Memory Foam) Technology that's soft and pliable yet stiff upon impact. Strategically placed Trac-Grip technology with silicone grippers on the upper and lower cuffs help hold the guards in place and limit migration. The Flex Lite Elbow Guard is protection so light, flexible, and comfortable you won't know you're wearing it. CE 14120 Certified.

Sizes:

## OPTION

### KNEE PADS

The Option Knee Pad offers full knee to shin coverage through an asymmetric design that provides an anatomical fit for both the left and right leg. A hard molded external shell with a reinforced TPR hinge system and a perforated bio-foam liner for increased breathability round out this versatile knee pad.

Sizes:

## OPTION

### ELBOW PADS

Option Elbow Pads offer full elbow and forearm coverage through an asymmetric design that provides an anatomical fit for both the left and right arms. A hard molded external shell with a perforated bio-foam liner for increased breathability round out this versatile elbow pad.

Sizes:

## OPTION AIR

### KNEE PADS

The Option Air Knee Pad provides lightweight protection and maximum airflow thanks to a Flyte Liner with impact dampening pads that lift the knee pad off the skin for increased airflow. Hard molded knee and shin cups increase patella protection. Integrated medial pads add extra inner knee protection. CE and EN 14120 Certified.

Sizes:

## OPTION AIR

### ELBOW PADS

Option Air Elbow Pads provide lightweight protection and maximum airflow thanks to a Flyte Liner with impact dampening pads that lift the elbow pad off the skin for better airflow. Hard molded external plastic cups provide optimum protection against debris and collisions. CE and EN 14120 Certified.

Sizes:

# EPIC KNEE

## KNEE PADS

Positioned between a knee brace and a knee pad, the Epic Knee Pad incorporates design elements from high-end EVS knee brace technology. With a Form Fit Frame built from polyfusion polymer, the Epic Knee Pad offers complete shin and patella coverage by combining knee brace and knee pad technology in one package. CE EN 1621-1 Certified.

Sizes:

# EPIC ELBOW

## ELBOW PADS

Epic Elbow Pads provide lightweight and breathable elbow and forearm protection with active compression sleeves to reduce arm pump and enhance comfort and protection. Silicone grip cuffs reduce pad movement when active so riders can focus on track or trail with zero distractions.

Sizes:

# SLAM COMBO

The EVS Slam Combo is sold as a set and includes Option Knee & Elbow Pads and R2 Race Collar. The ultimate protection combo at a fraction of the price.

Sizes:

HELMETS

# FIND YOUR ADVENTURE

Adventures are made on motorcycles; our T5 helmet, with a dual EPS liner, Race Collar Integrated Gasket, and Max Flow ventilation system, is designed to protect what matters most so you can go on your next epic motorcycling adventure.

T5

HELMET

P13

# T5 VENTURE

## SOLID

The T5 Venture is EVS's crossover ADV and dual sport helmet designed for versatility and quick setup changes. At only 1,587 grams, the T5 Venture is a lightweight, breathable adventure helmet that can quickly be reconfigured to accept goggles by removing the scratch and fog-resistant shield. Add to that comfort features like an adjustable mouth intake port, RAM air cooling system, and removable and washable moisture-wicking comfort liner, and you have the ideal lightweight adventure-ready helmet. DOT and ECE 22.05 Certified.

# RACE COLLARS DON'T RISK YOUR NECK

Riding or driving will always involve a level of risk. Choosing to wear a Race Collar minimizes the risk of dangerous neck injuries in multiple scenarios without being uncomfortable or limiting your range of motion.

R4

RACE COLLAR

P16

## R4

### RACE COLLAR

Weighing in at only 635 grams, the R4 is a lightweight, form-fitting race collar offering protection against neck and collarbone injuries. The R4 uses EVS's elastic Cross Strap system to secure the collar firmly in place, while the Rapid Lock closure system makes for easy front entry. With its low-profile design, the R4 Race Collar can be worn on the track or trail with minimal distraction and maximum comfort.

Sizes:

## R3

### RACE COLLAR

The R3 Race Collar easily connects to most roost deflectors to help prevent injuries to the neck area. When placed between the helmet and shoulders, the R3 Race Collar helps minimize cervical spine overstretching in the event of a fall.

Sizes:

## R2

### RACE COLLAR

The R2 Race Collar's low-profile design easily connects to most roost deflectors to help prevent injuries to the neck area when placed between the helmet and shoulders. The R2 Race Collar features a removable and washable liner and an easy-to-use front entry system.

Sizes:

# CHEST PROTECTION BREAK THROUGH THE ROOST

There's no getting around it...getting roosted hurts! With a variety of options and styles to choose from to suit all different types of riding, our Roost Deflectors are purpose built to help you break through the roost and ride on pain free.

F1

ROOST  
PROTECTION

P18

# F2

## ROOST DEFLECTOR

The F2 Roost Deflector's innovative modular design allows riders to customize their protective setup for various riding conditions and preferences. The two-piece Pivot System chest plate on the F2 articulates with the rider's lateral leans to provide more fluid movements and is designed to fit all EVS race collars and most neck braces. An internal Flyte Liner lifts the deflector off the skin for increased airflow. Exterior Flow Vents provide additional air circulation. The F2 is CE 14021 Certified for roost deflection, and CE 1621-1 Certified for back impact protection.

Sizes:

Colors:

# NEW F1

## ROOST DEFLECTOR

The F1 is a lightweight, form-fitting modular roost deflector designed to be worn over or under the jersey to provide optimal roost protection, functionality, and comfort. The F1's exterior Impact Shield and plush bio-foam liner provide optimum protection against debris and collisions. Grid-style air vents provide additional air circulation to regulate core temperature. The F1 Roost Deflector is Race Collar Compatible and strategically designed to fit all EVS race collars and most neck braces. Integrated loop straps ensure the race collar stays in place during use.

Sizes:

Colors:

# REVO 5

## ROOST DEFLECTOR

The Revo 5 is the roost deflector of choice for riders seeking modular front and back protection in a comfortable, sleek, under-the-jersey design. The Revo 5 is built to be the most versatile and vented roost deflector in the EVS line, with removable shoulder pads and enough adjustability to protect riders of all sizes. The Revo 5 is Race Collar Compatible, which means it is strategically designed to fit all EVS race collars and most neck braces. CE and EN 14021 Certified.

Riding natural terrain is beautiful and exciting but can also be unpredictable. A Ballistic Jersey is ready for anything that nature can throw at it with full chest and back protection, elbow and shoulder pads, and more.

**P18**

# G7

## BALLISTIC JERSEY

The G7 offers ultimate offroad upper body protection against debris and impacts. The G7 incorporates Impact Shield technology, an exterior high-impact-tested polymer located on the front and back that provides optimum protection against debris and collisions. An integrated kidney belt adds lower back support and stability. Whether you're on a trail ride or multi-day adventure, the G7 Ballistic Jersey provides all-day comfort and protection. CE Certified to EN 14021 for chest, and CE Certified to EN 1621-2 Level 1 for back protection.

Sizes:

# G7 LITE

## BALLISTIC JERSEY

The G7 Lite offers the ultimate offroad upper body protection in a lightweight sleeveless design. An exterior Impact Shield shell is made from a high-impact tested polymer to provide optimum protection against debris and collisions. Flow Vents provide air circulation to help regulate your core temperature. An integrated kidney belt provides lower back support and added stability. The G7 Lite is strategically designed to fit EVS race collars and most neck braces. CE Certified to EN 14021 for chest, and CE Certified to EN 1621-2 Level 1 for back protection.

Sizes:

# SOFT BALLISTIC PRO

## BALLISTIC JERSEY

Superior protection meets ultimate comfort; the Ballistic Pro provides the best of both. The Ballistic Pro features RMF (Reactive Memory Foam) Technology that's soft and pliable in its natural state yet stiffens when force is applied to provide a protective impact barrier. Perforated Air Mesh fabric allows air to flow unimpeded while protecting against abrasion and sunlight. The Ballistic Pro is CE 1621-3 Certified for chest, and CE 1621-1 Certified for back protection.

Sizes:

# COMP SUIT

## BALLISTIC JERSEY

The Comp Suit is an ultra-lightweight breathable ballistic jersey with integrated mesh stretch panels to provide full torso front and back protection and superior fit. Flow Vents located on the exterior Impact Shields of the chest, back, arms, and shoulders provide air circulation. An integrated kidney belt (Adult sizes only) provides lower back support and added stability on longer rides. The Comp Suit is strategically designed to fit EVS race collars and most neck braces.

Sizes:

# TUG

# TECHNICAL UNDERGEAR

## 3/4 IMPACT PANT

TUG

The Impact 3/4 Pant is an offroad-specific performance base layer that uses four-way stretch and moisture-wicking materials for comfort and RMF (Reactive Memory Foam) Technology that's soft and pliable in its natural state yet hardens when force is applied to provide a protective barrier. The Impact 3/4 Pant provides performance and protection that seamlessly integrates with your offroad riding pants.

Sizes:

## IMPACT SHORT

TUG

TUG Impact Shorts use four-way stretch technology to improve rider comfort and moisture-wicking materials to pull water off the skin so you stay dry and comfortable when riding. Air Mesh perforated fabric allows air to flow unimpeded while still protecting skin from abrasion and sunlight. Strategically placed impact pads add an extra layer of protection in critical areas, and an Anti-Chafe Layer prevents knee braces or knee pads from causing discomfort.

Sizes:

## PADDLED SHORT

TUG

Tug Padded Shorts feature an Anti-Chafe Layer designed to fit between you and protective gear such as knee braces or knee pads to eliminate discomfort. Strategically placed impact pads in key areas add an extra layer of protection in the event of a fall. Simultaneously, moisture-wicking four-way stretch materials pull water away from the skin, so you stay dry and comfortable when riding.

Sizes:

## VENTED SHORT

TUG

The TUG Vented Short is a lightweight and breathable, form-fitting compression short designed for warm weather riding. Air Mesh Perforated fabric allows air to flow unimpeded while still protecting skin from abrasion and sunlight. Designed with fewer seams to reduce pressure points, the TUG Vented Short utilizes a low-profile chamois pad and four-way stretch materials to pull water away from the skin so you stay dry and comfortable when riding.

Sizes:

## MOTO BOXER

TUG

Save your standard boxers from moto-riding wear-and-tear with TUG Moto Boxer shorts. These lightweight, form-fitting, breathable compression shorts are ideal for any type of riding and feature a super-soft elastic waistband and low-profile microfiber liner to wick away moisture. Designed to fit between you and your protective gear, the Moto Boxer acts as an Anti-Chafe layer to prevent skin irritation and discomfort.

Sizes:

## IMPACT VEST

TUG

By using RMF (Reactive Memory Foam) Technology that's soft and pliable in its natural state, yet hardens when force is applied, the TUG Impact Vest provides comfort and protection in an under-the-jersey short sleeve design. Perforated Air Mesh fabric allows air to flow unimpeded while still providing abrasion protection. Strategically placed impact pads add an extra layer of protection in critical areas. CE 14021 Certified.

Sizes:

## CTR VEST

TUG

The CTR (Core Temperature Regulating) Vest is designed to help control core body temperature in hot and humid conditions. Once saturated with water, the CTR Vest's Cold Touch Fabric reduces the fabric temperature by up to 30 degrees and remains cool for the duration of an average length motocross moto. The CTR Vest is strategically designed to fit all EVS race collars and most neck braces.

Sizes:

## SLEEVELESS

### TUG

The TUG Sleeveless shirt is a minimalist underlayer designed to keep you cool in warm weather riding conditions while acting as a barrier to prevent skin irritation and discomfort from safety equipment, such as a roost guard or race collar. Perforated Air Mesh fabric allows air to flow unimpeded while still providing abrasion protection.

Sizes:

## SHORTSLEEVE

### TUG

The TUG Short Sleeve shirt is a minimalist underlayer designed to keep you cool in warm weather riding conditions while acting as a barrier to prevent skin irritation and discomfort from safety equipment, such as a roost guard or race collar. Perforated Air Mesh fabric allows air to flow unimpeded while still providing abrasion protection.

Sizes:

## LONG SLEEVE

### TUG

The TUG Lone Sleeve shirt is a base layer designed to keep you warm during cool weather riding. Four-way Stretch technology allows the fabric to flex and move in all directions providing improved comfort. Also acts as a barrier to prevent skin irritation and discomfort from safety equipment such as a roost guard or race collar.

Sizes:

## BEANIE

### TUG

The TUG Sweat Beanie helps absorb sweat and prevent moisture from dripping inside goggles. This one-size-fits-most beanie made from a vented Lycra material with terrycloth sweatband is a must-have item during the hot and humid dog days of summer.

Sizes:

# FUSION SOCKS

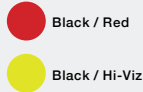

## TUG

Fusion Socks are a mainstay in riders' gear bags and a favorite among riders of all disciplines. Vented Lycra construction with reinforced heel and toe is durable and helps keep feet and legs cool. Strategically placed sticky silicone grippers located in crucial positions help hold knee braces or knee pads in place by limiting migration when riding.

Sizes:

Colors:

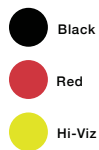

# MX SOCKS

Socks are an item where small details make a huge difference. With added height for extra comfort under your knee protection, reinforced heel and toe for added durability, and a compression band around the arch for increased support, EVS Moto Socks offer riders premium performance that suits various rider preferences.

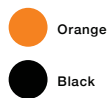

Sizes:

## COOLMAX

## SB02

### SHOULDER SUPPORT

The SB02 Shoulder Support features a minimalist design that provides superior compression and support for shoulder injuries. Breathable 3mm perforated neoprene construction is Velcro compatible and has an adjustable arm closure to eliminate underarm chaffing. The universal no-snap design of the SB02 provides easy on, easy off protection and support for left or right shoulders.

Sizes:

## SB03

### SHOULDER SUPPORT

Like the SB04, the SB03 Shoulder Support is designed to provide superior compression and support for shoulder injuries by utilizing the EVS X-Strap Stabilizer and Impact System—minus the molded EVA shoulder cup. The X-Strap System fits over the brace to keep it firmly in place on the shoulder when riding, and the adjustable arm closure design eliminates underarm chaffing.

Sizes:

## SB04

### SHOULDER SUPPORT

The SB04 Shoulder Support is designed to provide superior compression and support for shoulder injuries by utilizing EVS's X-Strap Stabilizer and Impact System. The no-snap universal easy on, easy off design of the SB04 fits left or right shoulders, and adjustable arm closures eliminate underarm chaffing. The SB04 also includes a heavy-duty molded EVA shoulder cup with 1680D ballistic nylon for added impact protection.

Sizes:

## SB05

### SHOULDER SUPPORT

The SB05 with breathable Air Mesh construction provides superior compression, airflow, and support for shoulder injuries. EVS's X-Strap Stabilizer System fits over the brace to keep it firmly in place and provide double shoulder support. The universal no-snap design with TPR gripper pull-tabs makes for easy on, easy off shoulder support with adjustable arm closures that help eliminate underarm chaffing.

Sizes:

# BB1 CELTEK

## KIDNEY BELT

The BB1 Celtek Kidney Belt is ergonomically designed to provide maximum lower back and kidney support without hampering mobility. Low-profile breathable construction with a perforated biofoam core and reinforced lower spine panel provides optimal ventilation and support.

Sizes:

# BB1 AIR

## KIDNEY BELT

The BB1 Celtek Air Kidney Belt provides maximum support and airflow without hampering mobility. Lightweight and breathable, the BB1 Celtek Air uses a perforated biofoam main support with TPR reinforcement outriggers to hold the belt in place. Medical grade elastic adds improved compression.

Sizes:

## AB07

### ANKLE SUPPORT

With its slip-on design, the AB07 Ankle Brace uses Ariaprene™ to stabilize the ankle with a breathable compression sleeve and elastic hook and loop closure system. Articulated ankle flex inserts add an extra layer of protection and support. Dual pull tabs make for easy on, easy off.

Sizes:

## AS14

### ANKLE STABILIZER

The AS14 Ankle stabilizer provides mild support for individuals suffering from chronic ankle instabilities or those looking to prevent an ankle injury. The AS14 supports the ankle's weakest point yet allows normal dorsiflexion and plantar-flexion (bending).

Sizes:

## AS06

### ANKLE SUPPORT

The AS06 Ankle Support reinforces the stability and strength of your ankle joint. With a special knit fabric that fits the natural shape of your ankle, the AS06 brace delivers compression without hurting pressure points.

Sizes:

## WB01

### WRIST SUPPORT

The KS199 Knee Stabilizer is designed to provide compression support and stability. The slip-on stretch mesh design of the KS199 is breathable and includes gel inserts on each side of the knee and anti-slip gripper elastic to help grip the motorcycle.

# KS199

## KNEE SUPPORT

The KS199 Knee Stabilizer is designed to provide compression support and stability. The slip-on stretch mesh design of the KS199 is breathable and includes gel inserts on each side of the knee and anti-slip gripper elastic to help grip the motorcycle.

Sizes:

# KS61

## KNEE SUPPORT

The KS61 Knee Stabilizer with its pre-curved anatomical design boosts fit and comfort, while conical straps wrap the upper and lower leg with compression support. The open knee design of the KS61 uses a padded patella buttress to ensure the knee cap stays secure.

## SHORTSLEEVE

### TUG

The TUG Short Sleeve shirt is a minimalist underlayer designed to keep you cool in warm weather riding conditions while acting as a barrier to prevent skin irritation and discomfort from safety equipment, such as a roost guard or race collar. Perforated Air Mesh fabric allows air to flow unimpeded while still providing abrasion protection.

Sizes:

## LONG SLEEVE

### TUG

The TUG Lone Sleeve shirt is a base layer designed to keep you warm during cool weather riding. Four-way Stretch technology allows the fabric to flex and move in all directions providing improved comfort. Also acts as a barrier to prevent skin irritation and discomfort from safety equipment such as a roost guard or race collar.

Sizes:

## SLEEVELESS

### TUG

The TUG Sleeveless shirt is a minimalist underlayer designed to keep you cool in warm weather riding conditions while acting as a barrier to prevent skin irritation and discomfort from safety equipment, such as a roost guard or race collar. Perforated Air Mesh fabric allows air to flow unimpeded while still providing abrasion protection.

Sizes:

# FUSION SOCKS

TUG

Fusion Socks are a mainstay in riders' gear bags and a favorite among riders of all disciplines. Vented Lycra construction with reinforced heel and toe is durable and helps keep feet and legs cool. Strategically placed sticky silicone grippers located in crucial positions help hold knee braces or knee pads in place by limiting migration when riding.

Sizes:

Colors:

Blk / Red

Blk / Hi-Viz

# PADDED SHORT

TUG

Tug Padded Shorts feature an Anti-Chafe Layer designed to fit between you and protective gear such as knee braces or knee pads to eliminate discomfort. Strategically placed impact pads in key areas add an extra layer of protection in the event of a fall. Simultaneously, moisture-wicking four-way stretch materials pull water away from the skin, so you stay dry and comfortable when riding.

Sizes:

# VENTED SHORT

TUG

The TUG Vented Short is a lightweight and breathable, form-fitting compression short designed for warm weather riding. Air Mesh Perforated fabric allows air to flow unimpeded while still protecting skin from abrasion and sunlight. Designed with fewer seams to reduce pressure points, the TUG Vented Short utilizes a low-profile chamois pad and four-way stretch materials to pull water away from the skin so you stay dry and comfortable when riding.

Sizes:

## FREIGHTER

### GEAR BAG

A rolling bag that's a gear hauler with room for essentials and more. A ballistic nylon shell with reinforced stitching, an abrasion-resistant base, multiple pockets, and plenty of padding to protect your gear means the Freighter Bag is ready for the long haul.

## KNEE BRACE

### GEAR BAG

An ideal way to transport and protect your EVS Knee brace investment. Each Knee Brace Bag is perfectly sized to accommodate one pair of EVS knee braces.

## BACKPACK

### GEAR BAG

This comfortable backpack offers a ton of storage options without the bulk. Constructed from an outer ballistic nylon shell with reinforced stitching, the EVS Backpack includes a padded laptop compartment and padded back and shoulder straps for all-day comfort.

## HELMET

### GEAR BAG

The EVS Helmet Bag is a sturdy soft-lined ballistic nylon bag designed to protect your helmet investment. With padded sides, a reinforced bottom, and duffel straps with handles, this helmet bag helps protect your helmet from dings and scratches during transport.

# HATS

Hot days at the track call for a EVS hat to keep the sun and sweat out of your eyes while sporting a unique look. Make the most of these sweet summer days and nights with one of our EVS Flex-Fit or Snapback hats.

## WARRANTY

Every EVS product is covered by a one-year (from date of purchase) warranty on manufacturing defects when purchased new from an authorized EVS Dealer. eBay sellers and other sellers may not be considered authorized EVS dealer sellers. Warranties cover original manufacturing defects in material and/or workmanship, not normal wear and tear. All products covered by this EVS warranty program will be repaired or replaced. EVS headquarters will determine whether a product can be repaired or must be replaced. Products will be replaced with like or similar product size and model as those originally purchased. Can upgrade at additional cost. No downgrades or refunds. Customer must obtain a warranty return authorization number and must include it on the warranty return form when returning the product to EVS. The proof of purchase must be included with the return. All warranty returns must be sent to EVS Headquarters (California), postage prepaid. All product shipped to EVS Central (Wisconsin) will be refused and returned to sender. EVS will pay for regular ground rates costs for products repaired or replaced under warranty within the first year, when proof of purchase is provided. Customer is responsible for any express shipping charges above regular ground. When a product is in a backorder status, warranty replacements will be given priority when new product is received. Dealers should advise their customers to direct all warranty questions or problems directly to EVS Headquarters. The decision for all warranty issues must come from EVS Headquarters directly.

### WARRANTY ON KNEE BRACES

One-year warranty (with proof of purchase). We will repair what is broken and ship back free of charge. After one year or no proof of purchase, repair prices are as follows:

- One buckle replaced: \$10.00
- All buckles replaced: \$40.00 per brace
- Knee cup / liner: \$20.00 per brace
- Complete refurbishment (including all d-rings, knee cup and hinge covers): \$60 per brace
- Shipping: \$12.95 one brace / \$17.95 two braces
- Handling: \$3.00 (required for residential shipping)

If there is no proof of purchase, or if it is over one year, a new knee brace must be purchased.

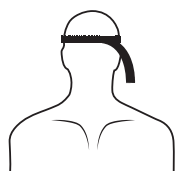

### EVS RETAIL & RIDER CUSTOMERS

Any EVS product may be returned within 30 days of date of purchase for a refund if purchased directly from EVS. Any unused (in new condition) product returned must be accompanied by a copy of the original invoice. There is no refund on original shipping and handling charges. A 20% restocking fee will be charged for products returned for refund. Products returned for credit toward a future purchase will not be charged a restocking fee. There will be no credit given on original shipping and handling charges. Freight will be charged on any subsequent purchase using the credit balance. If product was purchased elsewhere it should be returned to that dealer, unless there is a warranty or manufacturing issue. EVS will not process refunds for retail customers for items purchased elsewhere. Any EVS product may be exchanged within 90 days of date from purchase if received by EVS unused and in new condition. A shipping and handling fee will be charged. A return authorization (RA) number/form must be obtained before returning the product. A copy of the original invoice must be included with the return and return form. Contact EVS Sports at 262-788-7313 for an RA number/form.

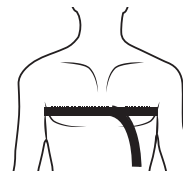

### DEALERS & DISTRIBUTORS

EVS products may be returned for a refund or credit as long as the product is unused, in new condition and can be restocked. Credit to be determined if the item is an older and/or discontinued style. A 20% restocking fee will be charged. Restocking fee will not be charged if a replacement PO is submitted to EVS Sports. Dealers with credit terms will have their account credited. Dealers with COD terms will have a credit put on their account. Dealers who pay by credit card will receive a refund on their credit card. Dealers are to handle all non-warranty returns and exchanges of merchandise for their customers. This includes size or product exchange. If EVS handles a size exchange instead of the dealer, the customer will pay shipping both ways. Other exchanges or returns will not be handled by EVS for Dealer customers.

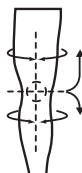

## HOW TO MEASURE

**HEAD**  
Using a cloth measuring tape, measure the circumference of your head at the point approximately one inch above the eyebrows in front, and at a point in the back of the head that results in the largest possible measurement.

**CHEST**  
Lift your arms up to the side and have your friend wrap the measuring tape under your armpits. Lower it until the tape is wrapped around the widest part of your chest.

**KNEE**  
Measure calf and thigh circumference 8" or 20cm above and below the center of knee

**HANDS**  
Measure the palm width around the widest point of your hand just below your knuckles. Then match that measurement to the appropriate glove size.
